MARTHA- Comic

This is just a sliver of Pi, as there are more than a trillion digits discovered.

A Slice Of Pi (Day)

Pi day is on March 14 every year, but what makes this one so special? 3.14 happens every year, but 3.14.15 is a once in a century occurrence. If you were really fancy, you could of celebrated at 9:26, and 53 seconds in.

For those people who have no idea what Pi is, it is commonly found when you divide the circumference of a circle (the perimeter of a circle) by the diameter (the distance across a circle through the middle). When you do you will get Pi, unless it was not a perfect circle. Go to http://www.angio.net/pi/digits/pi1000000.txt to see a million digits of Pi.

Pi Day At School

We have to thank the school for the delicious pies on Friday! My favourite was the blueberry! What was your favourite. Join the conversation at Google+

The Pigeon

By Zoe Ellis

Truffles:

Ingredients:

1/4 cup cocoa powder
1/2 cup icing sugar
5 tbsp melted butter

1. Put all the ingredients in the bowl
2. Mix them up!
3. Make little tbsp sized balls
4. Chill them in the fridge for 10 minutes
Enjoy!

**SQUAWK* roll them in toppings, if you want We want to see your truffles! Send in your pictures to journalist.pigeon@gmail.com and it may be shown!*

Horoscopes

Aries (21 March-20 April) You are experiencing desire for happiness, but it has been difficult to receive.

Taurus (21 April-21 May) Wonderful things are happening, you have the ability to forge ahead and conceal your future.

Gemini (22 May-22 June) You are struggling and find it difficult to explain that you are having a bad day

Cancer (23 June-23 July) Success is beginning to take shape. Take advantage.

Leo (24 July-23 August) Wasteful energy is causing regret and despair. Try to clean up your act.

Virgo (24 August-23 September) Too much refusal for help is consuming you.. Accept help and be proud of it.

Libra (24 September-23 October) Every cloud has a silver lining. Even when it doesn't show.

Scorpio (24 October-22 November) You are using your energies in the wrong ways. Focus on things that are easy and slowly make your way up to the harder stuff.

Sagittarius (23 November-22 December) You have lack of motivation and can't decide what path to take. Review your choices and make any changes to benefit you.

Capricorn (23 December-19 January) You are feeling like the world is being unfair. Accept it and move on.

Aquarius (20 January-19 February) Unhappiness and illusion of loss is taking over your life, when in reality nothing bad is happening. Step up and be strong.

Pisces (20 February-20 March) Be careful, exaggeration will get you nowhere. Always tell the truth.

SAVE THE MANATEES

By Rory Turnbull

Manatees- Some people know about these endangered gentle giants by their other names, Dugongs, Sea Cows or Sirenians. These marine mammals have found their way into many peoples hearts, both child and adult.

Manatees live in the Amazon river, around Florida, in a large bit of South america, the indian ocean, and the pacific ocean. There are several kinds of manatees, but, one kind which lived in the Bering strait, went extinct in 1768. The Settlers Sea Cow was hunted by aboriginals, but only went extinct when settlers came and hunted it for its meat, bones, and thick hide. It was hunted to extinction about 75 years after the settlers came.

But, the other breeds are in danger of extinction, to. Every year, manatees come in danger of death with boat propellers, red tide, and cold stress. As if those are not enough problems, manatees need to keep up a constant body temperature to live. So every winter, manatees crowd in hot springs and industrial sites. Some people take advantage of this and swim and kayak in the springs. This scares manatees away, so they don't have a place to keep warm.

But some caring people make a stand. You can donate to www.savethemanateeclub.org or join their adopt-a-manatee-program, and support a manatee! Please take this opportunity to help protect this species!
